Moteur à courant continu (source: https://www.sparkfun.com/products/10173)

Hobby Motor

ROB-10171 RoHS/

Description: Here is a basic hobby motor. It works well for basic things like making a fan or spinning something very fast without much resistance.

The motor has an operating voltage range of 1.5 to 4.5VDC and a no load speed of 12800 RPM (@4.5VDC, 320mA). More information is available in the spec sheet linked below.
